delete

forces a Reboot of VM machine

Pause the VM.

Permanently
deletes the
machine

- ✓ Shuts down the VM.
 - ✓ you will not loose any saved content but will loose unsaved content.
 - ✓ Stopped VM does not incur vCPU/memory charges but disk storage still costs.
- ↓
Storage

> Pauses the VM and save the state to the disk.

> state is saved & it continues from where you left -

> you are charged for storage of VM's memory but not for vCPU/memory while suspended.

you delete the machine ~~to~~ which you created .
